

Ultrasonic-Accelerometer Demo Video

- Team A1

Chan Xue Li (2102524)

Edward Foo Seow Wei (2101258)

Chrystal Lim Jing Yee (2102466)

A decorative network diagram in the top-left corner, featuring a cluster of interconnected nodes. Some nodes are solid blue circles, while others are white circles with blue outlines. They are connected by thin grey lines.

Ultrasonic Sensor

A decorative network diagram in the bottom-right corner, similar to the one in the top-left, with a cluster of interconnected nodes. Some nodes are solid blue circles, while others are white circles with blue outlines, connected by thin grey lines.

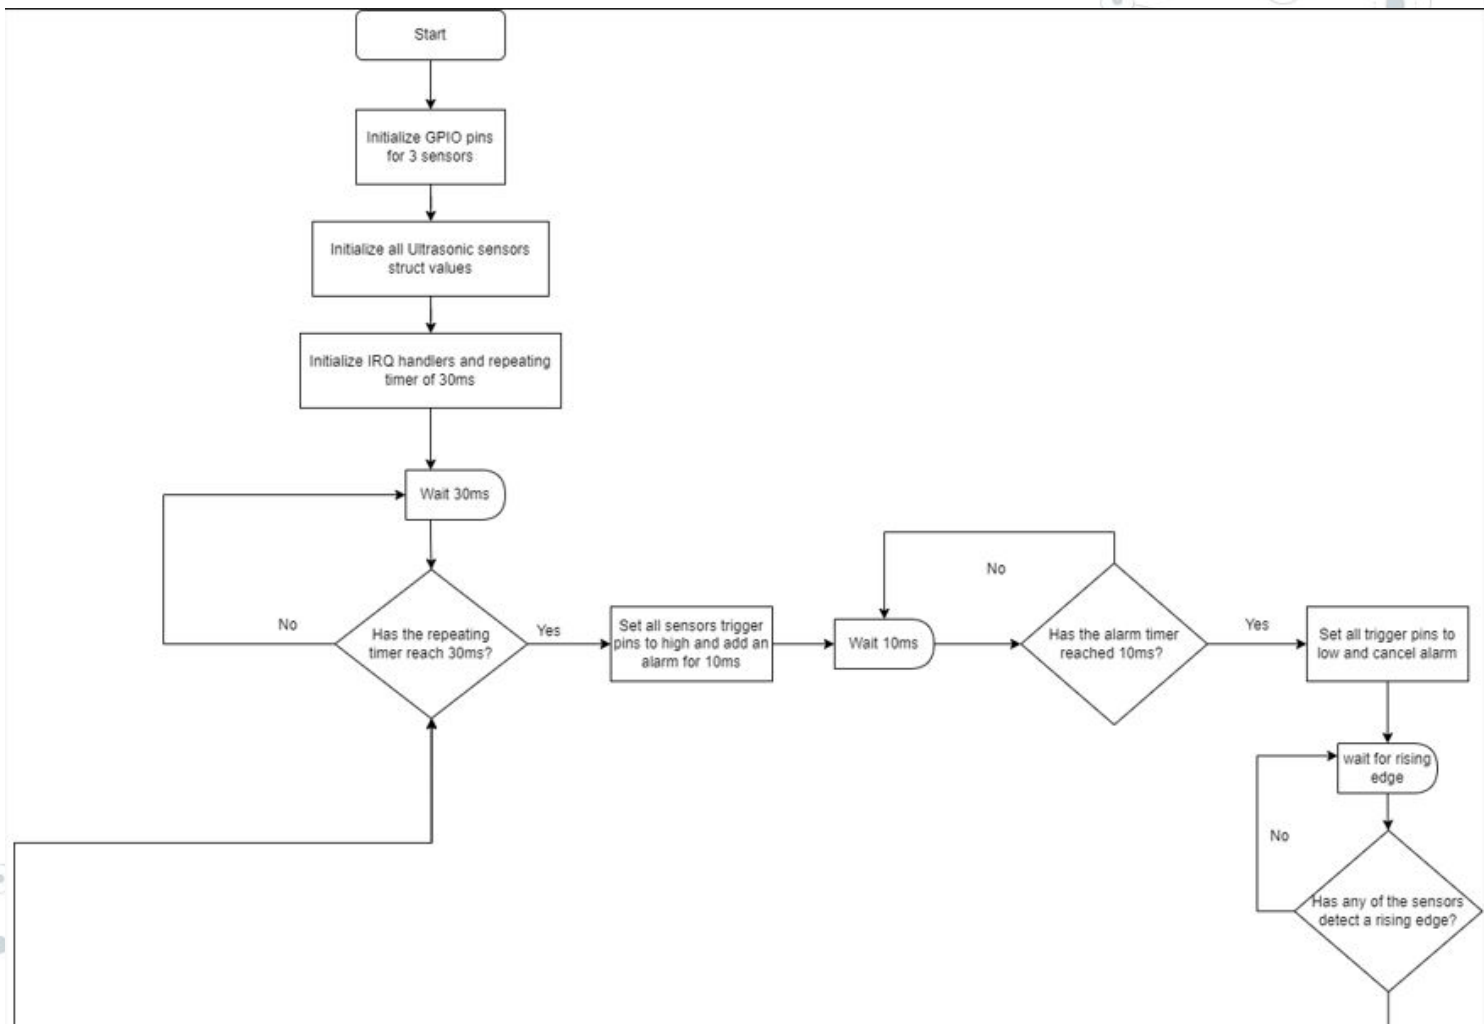

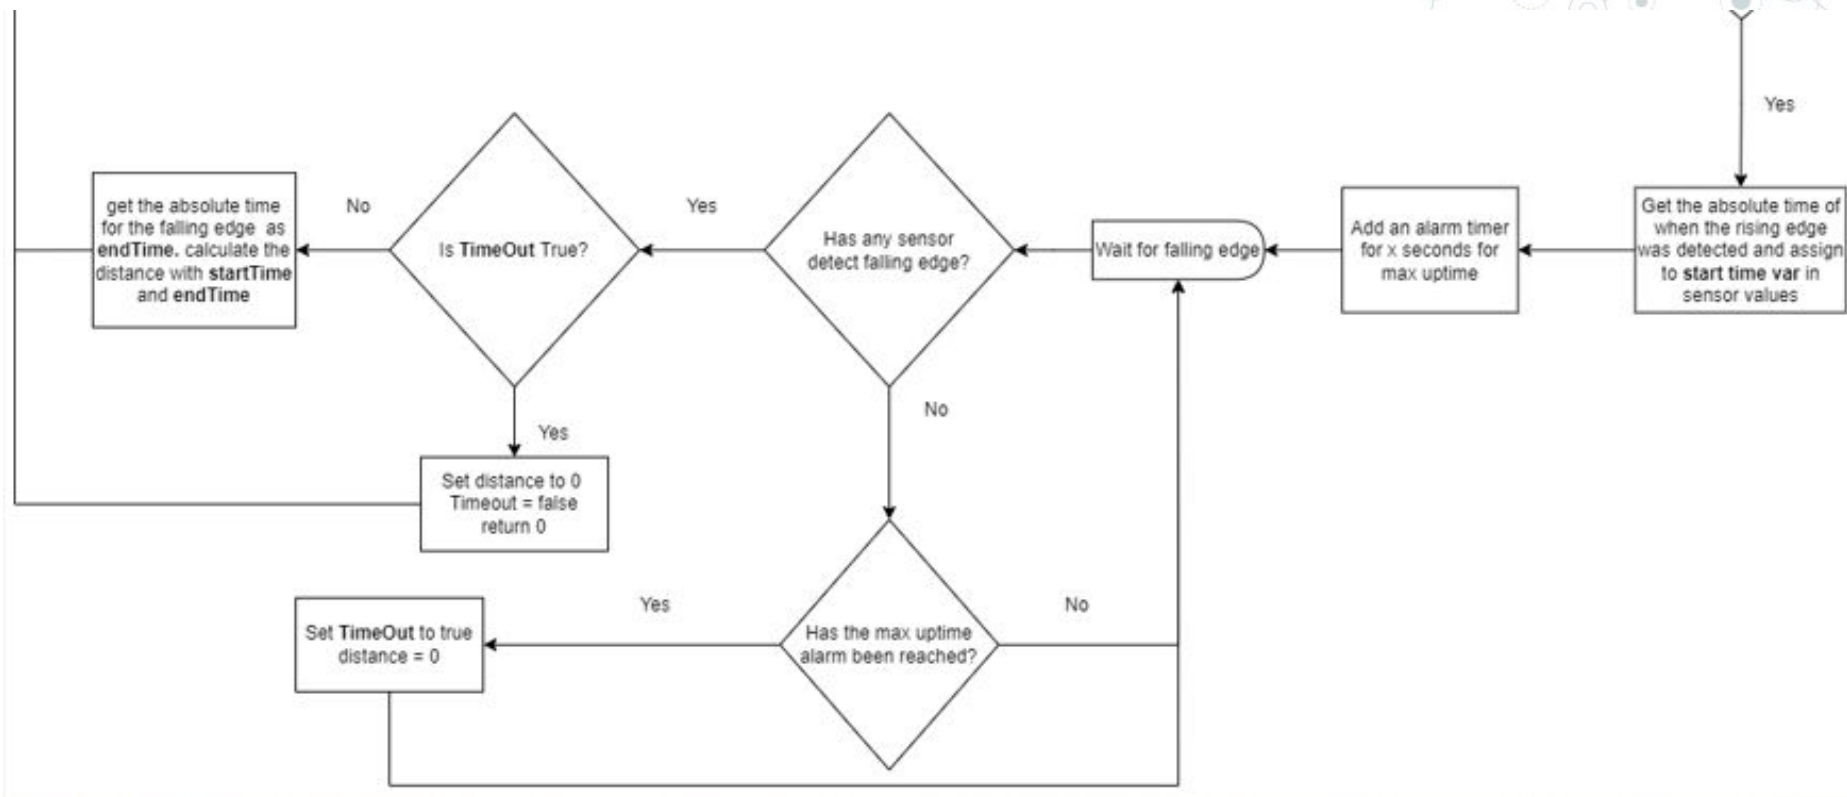

After 3ms , if still rising edge, call timer interrupt to force falling edge

- limit how far sensor can read the readings
- Save power for sensor.

∴ timeout = true

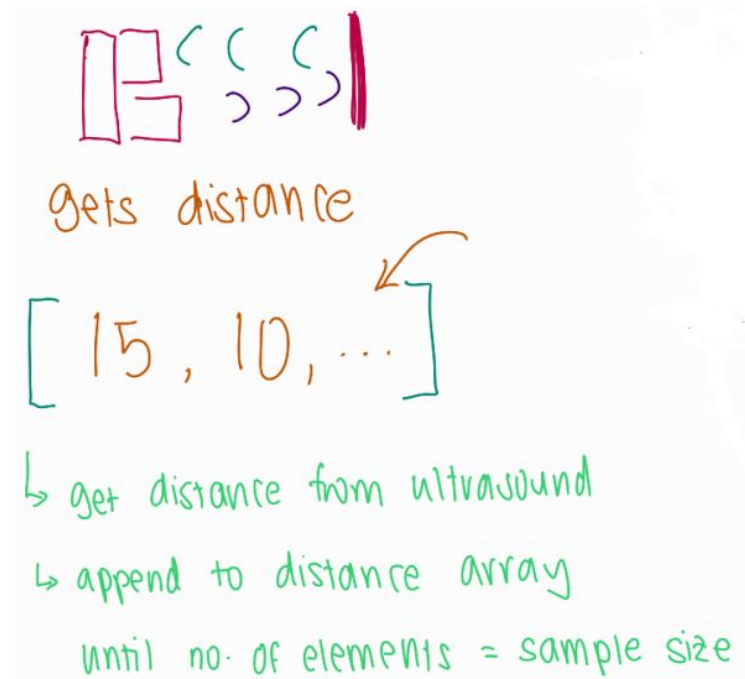

• Smoothing Algorithm

When distance
array has
no. of elements
= sample size

→

SAMPLE SIZE 10 (Ultrasound Distance)

SAMPLE SIZE 10 (Avg Ultrasound Distance)

SAMPLE SIZE 20 (Ultrasound Distance)

SAMPLE SIZE 20 (Avg Ultrasound Distance)

SAMPLE SIZE 30 (Ultrasound Distance)

SAMPLE SIZE 30 (Avg Ultrasound Distance)

SAMPLE SIZE 40 (Ultrasound Distance)

SAMPLE SIZE 40 (Avg Ultrasound Distance)

• Accelerometer Sensor

car just started &
is moving on
ground.

(base value)
 y value
 \Rightarrow y value when car is moving on ground

y value $>$ base value
hump = 1 \Rightarrow hump is detected
 \Rightarrow car is going up hump

Check:
if hump = 1
reset hump = 0

still on
the hump
hump = 1

Y value <
base value

⇒ car is going
down hump

↓ Y value

Y value = base value
hump = 0

⇒ car is moving
on ground

→ Y value
